

BT200

Insights to Power the Journey Ahead

The TOPDON BT200 provides a complete assessment of your 12V and 24V lead-acid batteries with 99.5% accuracy. Covering battery, cranking, and charging tests, it gives car owners and DIYers clear insights into overall battery condition.

Affordable, reliable, and easy to use, the BT200 makes full-scale diagnostics accessible for everyday users.

Features:

- Battery Test: Health status, state of charge, voltage, current, rating, and analysis
- Starting Test: Voltage, time, and starting analysis
- Load Test: Voltage output and analysis
- Reverse polarity protection
- Supports 12V GEL, AGM, EFB, and regular batteries
- Intuitive interface with step-by-step guided procedures
- Premium copper clamps
- 2.4" color LCD screen
- Data review function retrieves the latest reports
- Supports 12V and 24V VRLA, GEL, AGM, EFB, and regular batteries
- 100-2000 CCA testing capacity

Specs:

- Screen: 2.4" color LCD screen
- Screen resolution: 320*240 pixels
- Cable length: 36.22 inches
- Storage temperature: -4°F to 158°F
- Operating temperature: -4°F to 140°F
- Dimensions (L x W x H): 7 x 3.72 x 1.3 inches
- Weight: 1.0 lb

What's in the Box:

- BT200 Battery Tester
- User Manual
