

ArtiDiag Pro

Professional Diagnostics Within Reach

The ArtiDiag Pro is engineered for ultimate versatility, featuring 35 maintenance service functions and comprehensive system scanning for over 70 vehicle makes. Its bi-directional control allows users to quickly and precisely locate vehicle issues, while advanced ECU coding enables seamless customization of vehicle functions. The AutoVIN feature can automatically identify key vehicle information to diagnose and repair vehicles easier. A comparative data display can show up to 4 data streams on a single interface, allowing users to evaluate performance with comparative data and make accurate, efficient decisions.

Features

- 35 maintenance services for major vehicle models
- Active Test (Bi-directional control)
- Support ECU coding for modification
- Full-system diagnostics for engine, transmission, airbag, etc.
- Basic full-system diagnostic functions: ECU lookups, read & clear fault codes, etc.
